

Mini Thermal Detector

Yates Enterprises Mini Thermal Detector can detect human body surface temperature from a safe distance without physical contact. This method can help prevent the spread of infectious diseases such as COVID-19. The unique detector uses the highest quality and most precise temperature sensor on the market today.

In addition to a green light signifying in-range temperatures and a red light indicating out-of-range body temperatures, this system also uses voice warnings. These voice warnings can be customized to your desired language. Our high-quality temperature sensor integrates into walk through metal detectors, ordinary doors, intelligent access control systems, disinfection equipment, and other equipment that uses temperature measurement functions.

Product Features

- Quick screening
- Non-contact temperature measurement
- Voice alarm
- Visual notification ambient
- Application environment
- Panel display
- Prevents false alarms due to high temperatures

Mini Thermal Detector

ANT 530

- Shipping weight: Approx. 2.2 lbs.
- Product weight: 1.3 lbs.
- Power consumption: <8W
- Working temperature: 14°~104° F
- Operating humidity: 95%
- Power supply: AC 100-240V, 50/60Hz
- Working voltage: 12V
- Temperature measurement speed: <1 second
- Temperature measurement accuracy: ± 0.3
- Temperature measurement distance: 0.4–7.9 in
- Product size: 6.5 X 4.5 X 1.3 inches
excluding bracket and power adapter

Accessories

Give your customers the peace of mind they need to resume business with you, knowing they are being protected by all means available.
